

on April 27 - 1946 a few months after World  
War Two ended. Two young people were married.  
Donna Jean Stuckan 18 and Dean Robert Porter 22  
a country boy. 1946

Neither had traveled more than a few miles from  
home.

They wanted their honeymoon to be perfect and without  
hardly any money, they decided if they spent their  
money wisely they could go to "Niagara Falls" the  
honeymoon Capital of the World. They could also see  
a part of history, with one of the wonders of  
the World.

With a borrowed car, they started out on a trip  
of a lifetime. Strong roads for this young  
couple, and such beautiful scenery. Some  
never seen big hills and oh those beautiful  
rocks. It was so awesome and breath taking.

Traveling thru Ohio, Pennsylvania and into New  
York. Where they stayed in a cabin one night, then  
crossed into Canada, another country the next day.

Riding the "Maid of the Mist" was such great

adventure, and getting wet was part of the fun.  
We looked in awe as that mighty water came  
gushing over the falls. Surely it is a wonder.  
We returned on our 25th wedding anniversary,  
and were so surprised how things had changed.

Gone were the cabins, replaced by beautiful  
hotels, and the many, many stores where you  
could buy souvenirs, were even overwhelming.

Time changes many things, but the mighty Niagara  
Falls stay there, the same wonderful place where  
we first made our dreams for the future, and  
stood in awe, and marvel at this wonderful  
place to be. We have been so pleased.
