

RETUR N

To an ADDRESS from the Legislative Assembly to His Excellency the Governor General, bearing date the 18th ultimo, praying for a Return of the amounts which have already been expended for completing the Welland Canal from Thorold and Lock No. 18, respectively, to Port Dalhousie; the amount to be expended at Port Dalhousie for deepening the entrance, constructing Piers, protecting Works, the annual cost of keeping the entrance clear of sand, the depth of water there will be on the Bar when the contemplated Works are completed, and a Statement of all necessary expenditures connected with the said Harbour at Port Dalhousie ; with such Observations on the shallowing of the water on the Lake, as may have been made by the Officers of the Board ; and also whether a certain Survey, or pretended Survey, made by the subordinate Officers of the Board, during the Polling days of the late Election for the Town of Niagara, from Thorold to the said Town, was made under the authority of the Board of Works,—if so, the information derived by such Survey, and the intention of the Board in making the same.

SECRETARY'S OFFICE,
Montreal, 24th March, 1845.

By Command,
D. DALY, Secy.

Letter from the Secretary of the Board of Works to the Provincial Secretary, with three Enclosures.

BOARD OF WORKS,
Montreal, 24th March, 1845.

SIR,—Upon receipt of the Resolution of the House of Assembly, calling for certain information as to the cost of completing the Welland Canal from Thorold and from the head of Lock No 18, respectively, to Port Dalhousie, and other particulars connected therewith, the Chief Engineer in charge of the work was immediately written to, and instructed to furnish the details called for. These have been furnished, and I have now the honor of enclosing them to you, in order that they may be presented to the House by the proper officer.

I have the honor to be, Sir,

Your very obedient servant,

THOMAS A. BEGLY,
Secretary",

Hon D. DALY,
Provincial Secretary.

(First Enclosure.)

QUESTIONS proposed in a Resolution of the House of Assembly, dated 18th February 1845.

- Q. The amount already expended in reconstructing the Welland Canal from the head of the 12th (weir) Lock to Port Dalhousie ?—A. £119,200.
- Q. FronaThorold to the same place, i. e. Port Dalhousie ?—A. £211,361.
- Q. Amount to be expended for deepening and constructing Piers at Port Dalhousie ?—A. £17,541.

- Q. The annual cost of keeping the present entrance clear of sand ?—A. £150. It is not probable that this expenditure will hereafter be necessary, as all the silt can be removed in the spring by the water discharged from the immense reservoir situated above the first Lock.
- Q. The depth of water there will be over the Bar when the contemplated works are completed ?—A. 12 feet at low water mark.
- Q. A statement of all the necessary expenditures connected with said Harbour at Port Dalhousie ?—A. Salary of Harbour Master and Light House Keeper, cost of maintaining Light, and other similar expenses requisite in all harbours.
- Q. Such observations as may have been made by the officers of the Board relative to the shallowing of the water of the Lake.—A. A daily record of the levels kept by the Lock Tender during the last two years, and the observations of the same person during 15 years, corroborated by those made at Fort Niagara, tend to shew that the water is higher now than it was many years ago.
- Q. Whether the recent Survey was made under the authority of the Board of Works ?—A. The Survey was made by order of the Chairman of the Board (October 25th.)
- Q. The information derived by such Survey ?—A. See Plan and Report, which shew that although the ground between No 12 and Niagara is extremely favorable for the location of a Canal, the disadvantages of the Niagara Harbours, and the greater length and cost of this route, would, under any circumstances, have rendered its selection inexpedient.
- Q. The intention of such survey ?—A. To comply with the request made by Mr. Cayley and other gentlemen resident in Niagara.
- S. _POWER.

LIST of War Loss Claims remaining unpaid of the 3rd or 333 per cent. Third Instalment on the original award under Provincial Statute 4 Geo. IV, cap. 4, and 3 Will. IV, cap. 26 and 27, to be paid by monies raised on Debentures bearing interest at 5 per cent. per annum.

W. MORRIS,
R. G,

RECEIVER GENERAL'S OFFICE,
18th February, 1845.

Letter from the Civil Secretary to the Provincial Secretary.

CIVIL SECRETARY'S OFFICE,
• Indian Department,
20th February, 1845.

SIR,— With reference to that part of the Address of the House of Assembly requiring " the names of the " Indians entitled to such remuneration, whether " it " has been paid them, and if so, by whom and when ; "and also a detailed statement of the kind of evidence

"of such payment," I am directed by the Governor General to inform you that this Department is not in possession of any information on the subject, but that an application will be made to the Chief Superintendent Of Indian Affairs, who, it is possible, may be able to furnish some.

have the honor to be, Sir,
Your obedient servant,
J. M. HIGGINSON,
Civil Secretary.

The Honble. D. DALY,
Provincial Secretary.

22d March.

Letter from the Chief Superintendent of Indian Affairs to the Civil Secretary, with twelve Enclosures.

(Copy.)

INDIAN OFFICE,
Toronto, 13th March, 1845.

SIR,—I have the honor to acknowledge the receipt of your letter of the 21st ultimo, requesting me to transtnit to your Department any information in reference to the payment of the Indians for War Losses, that may be in my possession, and enclos ng a copy of your letter to the Provincial Secretary, embodying the substance of an Address of the I louse of Assembly to His Excellency the Governor General on the subject.

In reply, I have to observe that shortly after my appointment to the office of Chief Superintendent, I was directed by the Lieutenant Governor to remit to Mr. Superintendent Ironside, the sum of £664 17s. 6d. and to Major Winniett the sum of £918 9s. 2d., making in all £1583 6s. 8d., being the third, and, I believe, the last instalment due for War Losses to the Indians under their superintendence. The list of vouchers I placed on the files of this office on that occasion herewith transmit. The previous payments of the Indians were made by my predecessor, and as I do not find any vouchers for them in the office, I infer that they were at the time transmitted either to His Excellency the Lieutenant Governor, the Inspector General, or the Council Office.

In the vouchers for payments of the third instalment to the Six Nation Indians, the name of each individual who suffered loss is stated, and I presume the previous payments were made to the same individuals.

I have the honor, &c.

(Signed,) SAML. P. JARVIS,
Ch. S. I. Affairs.

J. M. HIGGINsoN, Esquire,
&c. &c. &c.

Letter from the Chief Superintendent of Indian Affairs to Mr. Superintendent Ironside.

SECRETARY'S OFFICE,
Montreal, 22d March, 1815,

By Command,
D. DALY, Secy.

Letter from the Deputy Inspector General to the Provincial Secretary:
INSPECTOR GENERAL'S OFFICE, Montreal, 20th March, 1845.
SIR,--I have the honor herewith to transmit a Return of the Tonnage and number of vessels owned in this Province, distinguishing those employed on the Lakes, those in the River St. Lawrence between Montreal and Kingston, and on the Rideau Canal, those in the River St. Lawrence above Quebec, those in the Coasting Trade below Quebec and in the Gulf of St. Lawrence, and those in Trade beyond the Seas, as nearly as can be ascertained, as required by an Address from the Honorable the Legislative Assembly, 10th February, 1844, herewith returned. I have the honor to be, Sir,
Your most obedient servant,
JOSEPH CARY,
Deputy Inspector General.
Honorable D. DALY, Provincial Secretary. D

RETURN Of the Tonnage and number of Ships and other Vessels owned in this Province in the year 1844, distinguishing as nearly as may be, those employed on the Lakes, those in the River St. Lawrence above Quebec, those in the Coasting Trade below Quebec and in the Gulf of St. Lawrence, and those in Trade beyond the Seas, as nearly as can be ascertained, &c., furnished pursuant to an Address from the Honorable the Legislative Assembly of 10th February, 1845.

INSPECTOR GENERAL'S OFFICE,
Montreal, 20th March, 1845.

JOS. CARY,
Deputy Inspector General.

RETURN

To an Address from the Legislative Assembly to His Excellency the Governor General, bearing date the 12th December, 1844, praying for a Statement of the number of Suits brought in the Court of Chancery since 19th July, 1841, shewing the number of suits actually adjudicated upon, the amount of costs taxed, and allowed on each suit, and the amount of fees paid on each suit to the Registrar, together with a detailed Statement exhibiting the aggregate sums received by that Officer, by way of fees and charges on the said suits.

SECRETARY'S OFFICE,
Montreal, 24th March, 1845.

By Command,
a DALY, Secy.

Letter from the Registrar of the Court of Chancery to the Provincial Secretary, with two Enclosures.

REGISTRAR'S OFFICE, COURT OF CHANCERY,
Toronto, 17th March, 1845.

SIR,—I beg to transmit you herewith, a Statement of the number of Suits instituted in the Court of Chancery, between the 19th day of July, 1841, and the 12th day of December, 1844, and of the number of Suits adjudicated upon during the same period ; also a Return of such costs as have been taxed during the same period, and the amount of Registrar's Fees during the first and last years of that period. The Suits in which costs have been taxed do not by any means embrace the whole number of Suits in which proceedings have been had during the period referred to, costs being frequently settled without taxation, and in the majority of cases the costs of unsuccessful parties are not taxed. Judging from the amount of Registrar's Fees during the two years referred to, I should infer that costs are taxed only in about one instance out of three or four in which they are incurred. The aggregate of the Registrar's Fees therefore, as appearing from the taxation of costs, will furnish no information as to the amount of the Fees actually derived from his office. The aggregate amount will appear by the Returns of the emoluments of the office; and for the accuracy of the Returns since I have held the office, I can vouch.

In omitting the Return of Registrar's Fees for the period between the first and last years, I am aware that I have not strictly followed the terms of your letter, but in explanation, I beg to say that I have been prevented by illness from making the Return so soon as I otherwise should have done,—that since my recovery I have devoted to it and to my office, almost more time and labor than my heath (imperfectly restored) could warrant, and I was unwilling to make the further delay which would necessarily occur in supplying the part omitted,—every bill of costs requiring to be examined throughout, in order to ascertain the amount of Registrar's fees contained therein. The Return enclosed exhibits the relative proportion between the Registrar's Fees and the general costs, during, the first and last years ; the proportion during the former period being about one third larger than during the latter, although the greater portion of the proceedings in the more expensive suits, taxed during the latter period, occurred during the former. In future the difference will be still greater. In future also, there can be no doubt that the costs in suits in Chancery will be materially diminished.,

I believe the Return of Registrar's Fees, during the omitted period, would furnish no additional information, but, if required, I will prepare such Return with as little delay as possible.

I have the honor to be, Sir,
Your obedient servant,

J. G. SPRAGGE,
Registrar.

The Honble. D. DALY,
Secretary of the Province,
&c. &c. &c.,

First Enclosure.

A STATEMENT of the number of Suits brought in the Court of Chancery from the 19th day of July, 1841, to the 12th day of December, 1844, shewing the number of Suits actually adjudicated upon—also a Schedule of costs taxed during the same period, and the amount of Fees paid to the Registrar during the first and also during the last years of the same period, in the suits in which costs have been so taxed, exhibiting the aggregate sums received by that officer by way of Fees and charges in the said suits during the said first and last years of the same period :

*umber of Suits brought in the Court of Chancery, from 19th July, 1841, to 12th December, 1844.....	463
ber of Suits adjudicated upon during the same period,	155

It should be explained that Suits are frequently disposed of in effect, otherwise than by a formal adjudication upon the hearing—the argument of pleas and demurrers—the granting or refusing of special injunctions, both parties being heard—motions to dissolve special injunction, and some other applications to the Court where the law and merits of the case are brought in question, frequently though not necessarily have the effect of a formal decision, the unsuccessful party not choosing to risk further proceedings. These are, of course, not embraced in the number above given of Ras adjudicated upon.

It frequently occurs also that a Plaintiff finding after answer, and perhaps after evidence gone into, that his case cannot be sustained, forbears to proceed, and the Suit is afterwards dismissed for want of prosecution. In-these ways, many Suits are disposed of without a regular adjudication.

J. G. SPRAGGE.,

This Statement shews the extent of the Steamboat navigation.

Locks 13-150 X 26A
Depth of water, 9 feet.
Width of bottom, 45 feet.
Width of towing path, 15 feet on top.
Do. berm bank, 12 do. do.
Side slopes, 2 to 1.
Total length, 111 miles.
Rise, 145 feet.

The prices assumed in this Estimate are the result of the most careful consideration, and the very extensive observations which there has been an opportunity of making on the actual cost of similar works.

In no instance has the value of the work on the Welland been over-estimated.

(*Third Enclosure.*)

WELLAND CANAL OFFICE,
St. Catharines, 6th March

WELLAND CANAL OFFICE,
St. Catharines, 6th March, 1845.

I directed one of my assistants (Mr. Slater) to take the levels of the line which was evidently most favorable for the construction of a Canal ; other and more urgent duties prevented this gentleman from at once completing the Survey until the latter part of October, when he entered Niagara on one of the Polling days; it has been asserted with an intention to influence the election against the gentleman who has now the honor to acknowledge the receipt of your letter of the 22nd, enclosing the Resolution of attending to this business, and he was unable to complete the Survey until the latter part of October, when he entered Niagara on one of the Polling days; it has been asserted with an intention to influence the election against the gentleman who has now the

I have, therefore, to submit the following Statement, honor to represent that Town. It does not seem possible which will, I trust, satisfactorily explain all the matters that the appearance of this officer could have exercised adverted to in the Resolution. **any influence on the election,—certainly it could not** have produced nor have been intended to produce such

On the 25th September, I was instructed by the an effect as that attributed to it, for it was well known Chairman of the Board of Works to make the Survey that the Survey was made in compliance with the re- and take the levels necessary for ascertaining the cost quest of many of the most respectable inhabitants, sup- of the proposed Canal, in compliance (as I understood) porters of the successful candidate, to defeat whom was with a request formerly made by Mr. Cayley and other the alleged object of the Survey. I shall merely say gentlemen resident in Niagara. that the selection of that day was purely accidental, the

I accordingly examined the ground lying between of the Polling days, so little interest did he feel in the that Town and a point situated at the head of the matter.

that Town and a point situated at the head of the matter. The plan which I have already forwarded to the twelfth Lock from Port Dalhousie, where the Welland Board, with the memoranda and estimates thereto at the cost of the additional Locks was a sufficient objection to the selection of any point higher up, and the height of the Canal, exhibits all the information acquired by the the table land between St. Catherines and Niagara Survey ; it shews that the ground between the points precluded the possibility of leaving the Canal lower above mentioned is exceedingly favorable for the location of a Canal, the line of which (marked blue on the

Appendix
(J. J. J.) plan) may be straight throughout, proceeding in a direct line from its departure from the Welland to its junction with the Niagara river. No obstacle whatever is presented, except by the valleys of the creeks which empty themselves into the lake between the mouth of the Niagara and Port Dalhousie, of which the Four and and Ten Mile Creeks can alone be considered formidable, and the expense of crossing even these is not considerable, being much less than that of the additional lockage and excavation which would be caused by the attempt to avoid those ravines by a line situated near the main ridge. The line for nine miles passes through that portion of the country denominated the Swamp, generally in the vicinity of the main road, and reaches the Niagara River immediately below Fort George, this point being selected as the entrance, for the reasons formerly assigned by Mr. Roy, " that the " current is too rapid for a safe harbour above, and below it would be exposed to the swells of the lake."

24th Much The accompanying Schedule shews the cost of the proposed Canal, and also that part of the Welland situated between No. 12 and Port Dalhousie, including the construction of that Harbour. It proves that the expense of the latter is at least £57,000 less than that of the former could have been : thus regard for economy must have induced the Board of Works, as well as the Welland Canal Company, to select Port Dalhousie as the entrance, in preference to the mouth of the Niagara ; but there are many more important reasons which must have exercised an influence on their decision. The length of the Canal from Port Dalhousie to No. 12 is seven miles—that of the proposed cut from the same point to Niagara is 114,—thus, the increased length of the route, and consequently the increased cost of transportation and loss of time, as well as the additional expense of maintainance, are serious objections. Although the Harbour of the Niagara River may possess some natural advantages, such as great depth of water, sufficient extent and tolerable shelter, it is, nevertheless, very inferior to the new Harbour about to be constructed at Port Dalhousie ; its defenceless position on the frontier, is an insurmountable objection—the entrance to the Canal would, in the event of a war, be exposed to instant destruction from the guns of the American Fort ; but apart from this, it labours under other serious defects, the removal of which is beyond the reach of art. When there are light winds from the southerly points, the rapid current renders the entrance very difficult ; and when the wind is from the northerly point and, therefore, apparently favorable for the entrance of vessels, the swell caused by the meeting of the waves from the lake and the current of the river, is attended with great danger. To its exposed situation in the event of war, and the difficulty of entrance during the prevailing summer winds (from the south) must be added the great danger arising from the floating ice late in the spring,—and the existence of a shifting bar at the mouth, which circumscribes the channel so far as to render the egress of vessels both difficult and dangerous when the wind is northerly.

The Harbour at Port Dalhousie will possess almost unrivalled advantages. Accessible at all times, it will have a depth of twelve feet water at its entrance ; an outer and well sheltered Harbour more than half a mile in length, amply sufficient for the accommodation of the trade, to which must be added the extraordinary advantage of its inner Harbour, two miles long and nearly half a mile wide, sufficiently large to contain all the vessels on both lakes ; completely sheltered by the surrounding hills, and raised by the first Lock above the influence of the lake, so that the water can scarcely be agitated during the most violent storms. The peculiar facilities for the construction of a graving dock, cornbitted with the extent and security of this inner Harbour, will, doubtless, at no distant period, render Port Dal-

Appendix
(J. J. J.) housie the winter resort of a large amount of shipping on the lakes. The location of the old piers, as well as their plan and construction, was so faulty, that a strong prejudice has existed in the minds of many against this Harbour. An examination of the plan of the new piers will shew that, after the completion of the works now in progress, this harbour will be free from all the defects which have been urged against it with much force and some justice. I am happy to be supported in the opinions now advanced by all the experienced masters of vessels whom I have had an opportunity of consulting.

24th March. &- g O
Appended to this Report is an account of a few of the recent disasters arising from the above mentioned defects in the Niagara Harbour. If so many accidents have occurred among the few vessels that visit this Harbour, and so few among the many that leave and enter Port Dalhousie, *defective as it at present is*, must be evident that the advantages of the latter and the disadvantages of the former have not been exaggerated in this Report.

Apprehensions are entertained by some, that at no very distant period, the lower lake may become so shallow—as to render all the works at Port Dalhousie useless. A daily record of the levels kept by the Lock Tender, since I have had charge of all the old works, and the observations of the same person during fifteen years, corroborated by those made at Fort Niagara since 1815, tend to show that the water of the lake is at least as high now as it was many years ago, and I have been unable to discover evidence to prove that any change is going on rapidly, or reasons to justify us in providing for so remote a contingency, long before the probable occurrence of which all our works will be in ruins.

Enough has been said to prove that, even if the selection of an entrance to the Welland were still an open question, Port Dalhousie should be preferred on account of the advantages of its Harbour, the shortness of the line, and economy of construction. It therefore seems needless at this time to make any remarks on the inexpediency of expending £230,000 on the construction of a lateral cut to Niagara, when a Canal, in every respect more efficient than that could possibly be, has been already constructed.

I have now furnished information on all the points adverted to in the Resolution of the House, though not exactly in the order there prescribed. Having first mentioned the authority under which the Survey was made,—2nd, the cause (as I believe) of its being made,—3rd, the information derived from the Survey, and the conclusion following a full examination of the relative advantages and disadvantages of the entrances at Port Dalhousie and Niagara, and the respective routes from these harbours to the nearest point of the Welland, and in connection with this, have shewn that there is no evidence to prove that any change in the level of the lake is going on rapidly.

I have the honor to be, Sir,
Your obedient servant,
(Signed,) S. POWER.
THOMAS A. BEGLY, Esquire,
Secretary, Board of Works.

Vessels lost or driven on shore in attempting to make Niagara Harbour :—" Thistle," " Essex," " General Wolfe," and " Brothers."

The "Bond Head" is the only vessel which has been wrecked at Port Dalhousie, and she was waterlogged before she neared the shore.
