

1956
"Golden Honeymoon Memories".

On Sept 9 1956 my husband and I were married in Winkler Manitoba. We had saved enough money during our courtship of two years that we could go to Niagara Falls for our honeymoon.

What a thrill it was to see and experience the beautiful Falls, both the Canadian and the American Falls were breath taking.

We also visited the Queenston Hydroelectric power plant and took many pictures of the many beautiful flowers and shrubs in the parks and gardens that stretch along the Niagara river.

At night the Falls were illuminated by white and colored lights which presented a beautiful picture of rainbow hued water.

We also visited the Whirlpool Rapids near the northern end of the river, which are almost as famous as the Falls. These Rapids are just wonderful to behold.

We took the cable way car from Colt's Point to Thompson's point on the opposite bank. The car is suspended from six cables which are about 1800 ft. long and is it breath takingly beautiful to travel by this means so high over the rapids

We also climbed up the staircase of the Brooks monument, that was another very unique experience.

We had a wonderful time in Niagara Falls and would recommend to everyone that is planning a honeymoon to visit the Falls.

On Sept 17th we visited the Chamber of Commerce where we were presented with a lovely honeymoon certificate, as a proof and a keepsake that we had actually been there. I'm enclosing a copy of it

Sincerely submitted

Lucy Martens
