

Our Honeymoon in Niagara Falls

1992

Our belated honeymoon was to Niagara Falls December 27, 1992. We were married 24 years ago, Dec. 21, 1968 and did not have a honeymoon at that time because it was my second marriage and I had 2 small children to think about. We now have 4 children and had always wanted to go to Niagara Falls for a honeymoon at Christmas time. Two years ago we were planning on going and my husband had surgery and last year he had a heart by-pass. This year all has gone well and so we took off Dec. 27 after Christmas. Sunday noon we decided to go so packed our bags and off we went. We arrived at the Falls and found a motel overlooking the falls, which was always my dream. We stayed at Days Inn on the 15th floor. We were lucky to get a place as we arrived at 5:30 and there were not too many rooms left. On our way up in the elevator I said, 15th floor! , what if there is a fire? My husband said, if we think that way we will never do anything. So up we went. Opening the door to our room we found a lovely romantic room overlooking the Falls. The motel had a sauna, swimming pool, and whirl pool but never thought, packing in such a hurry, I forgot to pack our bathing suits. Shortly after I walked in to have a look at the bathroom and wow, we had a whirl pool in our bathroom. That was great we could have our own private time.

We had a beautiful view from our room, could see the American Falls, the Canadian Falls and the Skylone Tower with 5000 Christmas lights on, just a breath taking view.

It was a lovely romantic holiday, we went up the Skylone Tower for dinner and had a magnificent dinner overlooking the Falls. I had never eaten in such a nice romantic setting and the food was superb. I was so excited about the view I set my camera on the ledge and my husband said you had better get your camera as it is moving.

We had walk down to the falls in the daytime and at night to see all the beautiful Christmas lights. We drove down along the Niagara River one sunny afternoon. What a beautiful drive, the river was so perfect and flat, with Canada Geese along the shore waiting to greet us. My husband stopped and we took some pictures of them. The sun shining on the trees covered with ice made a beautiful scenery.

We stayed 2 days and had to go back to the real world. We look forward to making this a yearly thing as there is so much more to see and such beauty close to home.
