January 27, 1993.

Dear Judges,

We will be married 30 years on February 15th. and we have many fond memories of our honeymoon at Niagara Falls. It is such an interesting city which has a special magnetism for us and it would be wonderful to celebrate our anniversary at the Falls.

As a child Niagara Falls was always a favourite place to visit, and we have an ^{old} picture of my cousin and myself which was taken in front of the picture que flower clock. When we began to discuss our honeymoon weekend Niagara Falls was the first choice for both of us.

We were married with our immediate families present, on a Friday evening, in a

small town near London. We had borrowed a vehicle ... a road map ... some suitcases ... and some money, and we travelled to Niagara for a very happy holiday at the Honeymoon Motel.

We did tour some places of interest to tourists. The Wax Museum was exceptional and very unique with figures so life-like that we said excuse me as we passed by the wax doorman. The Bar Museum too was interesting and the many interesting stores were fun to explore also.

One of the highlights of our trip was seeing the coloured lights on the ice and water, on the Falls, in the evening. It was a beautiful and spectacular sight! We regret that we did not take ... or borrow ... a camera, to capture the beginning of our

lives together, in photos; it wasn't a priority.

If we are fortunate enough to be chosen to go to Niagara in February we would take advantage of the MANY places of interest to tourists. We would bring our own suitcases... our own camera... and some of our own money this time, ^{we will try to} and help to rejuvenate this very special city as a honeymoon destination. We promise to be better tourists this time.

Sincerely,

Bruce & Betty Shelley
