The "Golden Honeymoon Memories"

We are one of these happy couples who started our marriage by a honeymoon in Niagara Falls, seeing more of our beautiful Province of Ontario. Then romance struck us. We decided to make plans for our August wedding in nineteen forty-seven.

We hadn't much money but decided most people only marry once, especially in those times. We were going to eat out and have a Church wedding later to go to Niagara Falls for our honeymoon. Niagara Falls was the honeymoon city at that time with its popularity.

We didn't have a new car like many people, but were satisfied with our nineteen twenty-seven ^{roadster} with a rumble seat to store our suitcases.

After arriving at Niagara and studying the accommodation prices. We realized we couldn't afford the beautiful hotels, satisfying ourselves to stay at Uncle Sam's Cabins. There wasn't any convenience, a shower and toilet in walking distances. However we knew we could afford this cabin for the week.

Our main attraction was the marvellous, roaring falls. Which were both fascinating and romantic. They are the wonder and pride of Ontario. A lot of time was spent just walking around the falls. The parks and flower beds were well kept and really appealed to us.

We took time to go over the river and back on the aerocar. Some thought it a little frightening. Not us, we enjoyed every minute of it. It was great to see the scenery from the aerocar.

In the country there were grapes growing.
He were to Port Dalhousie for a day. Which
is an amusement centre with lots of midway
attractions.

The falls are beautiful by day or lighted up
at night. It doesn't matter summer or winter.

I think people to-day go on a honeymoon
further than Niagara Falls. Whether they can
afford it or not, as they have credit cards.
These cards weren't heard of in our times.
It was so enjoyable that we would recommend
it to anyone for a happy beginning to any
marriage, anniversary or just an enjoyable
holiday at anytime.
